## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 24 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Group I, drawn to first embodiment as described in figure 8.

Group II, drawn to second embodiment described .in figure 9.

Group III, drawn to third embodiment as described in figure 10.

Group IV, drawn to fourth embodiment described .in figure 11.

Group V, drawn to fifth embodiment as described in figure 12.

Group VI, drawn to sixth embodiment described .in figure 13.

Group VII, drawn to seventh embodiment as described in figure 14.

Art Unit: 2814

Group VIII, drawn to eight embodiment described in figure 15-20.

Group IX, drawn to ninth embodiment as described in figure 21.

Group X, drawn to tenth to thirteen embodiments described in figure 22.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: none .

The different embodiments describe different placement of the thin film transistors or diode in the claimed devices which forms the different methods/ ways ( i.e . inventive concepts) of compensating for the shift in alignment that occurs during processing ( e.g. photolithography) of the device resulting in the poor display.

Eg. Embodiment I has overlapping areas thereby allowing each pixel to avail of the similar charge from any scan signal line.

Embodiment II provides alignment shifts of equal dimensions so as to cancel the effects of the shift.

Embodiment III provides several pixels which are vertically arranged to compensate each others shift effects.

Embodiment V provides a pixel with large area and bright display by increasing the aperture ratio of the LCD panel.

A telephone call was made to Parkhurst and Wendel on November 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
